

Register your station for NASA's Kid's Science News Network™ (KSNN)™

Did you ever wonder why the sky is blue or what causes a lightning flash? Would you like to know how an airplane flies, what's the coolest gas, or is there water on Mars?

Find the answers with NASA's Kids Science News Network™ (KSNN). These one-minute spots feature kids teaching math, science, technology, and NASA facts to other kids in an entertaining and instructional format. The spots are web- and video-based programs designed for kids in kindergarten through fifth grade, but they're flexible enough to be used by everyone—students, educators, parents, or anyone else that wants to know how things work or what makes things happen. KSNN™ explains the everyday phenomena of our world, corrects misconceptions, and answers frequently asked questions about the Earth and beyond. In its first year, KSNN won the coveted Parent's Choice Gold Award. Educators and parents can access supporting content, hands-on activities, related resources, a computer-graded quiz, and links to educational web sites on the program web site.

There are three ways to register your station:

Mail/Print: Fill in and mail the postage-paid registration form.

Online: E-mail your information to
dlcenter+mail@larc.nasa.gov

Phone: Call (757) 864-6100 and speak with a customer service representative.

Once registered, you will receive broadcast quality copies of new releases.

Not copyrighted. Off-air rights granted in perpetuity.

Currently available newbreaks

Why is the sky blue?
Why does popcorn pop?
How long is a meter?
Who invented the aeroplane?
What makes bubbles round?
What makes things go?
What causes a lightning flash?
Does an electro magnet work
like a regular magnet?
What are the northern lights?
What is sound?
What is static electricity?
Why do leaves change color?
